

ECLIPSE-IT 2010

SEPTEMBER 30TH AND OCTOBER 1ST, 2010 – SAVONA, ITALY

<http://2010.Eclipse-IT.org>

THE SAVONA UNIVERSITY CAMPUS

SPONSORED BY:

The 5th Italian Workshop on Eclipse Technologies

The **Eclipse** Integrated Development Environment is a widely used platform for the development of Object Oriented Applications. Besides, Eclipse is an open source **community** and ecosystem whose projects are focused on building an open development platform comprised of extensible frameworks, tools and runtimes for building, deploying and managing software across its lifecycle.

The **Eclipse-IT 2010** workshop is the fifth yearly meeting of the Eclipse Italian Community which includes both **Universities** and **Industries**, with the aim of joining researchers and practitioners, students and professionals, around the common interest in experimenting, extending, and supporting the Eclipse platform.

Due to a special interest and running project, this year, the Conference hosts a special session on the **Jazz**

cooperative development environment, based on the **Enforcing Team Cooperation** (ETC) Project. ETC involves many universities with the aim to bring together teams of students in order to develop software in a cooperative way.

Based on the success of the previous editions, the Eclipse-IT 2010 will host four tracks (regular and student papers, industrial demos, and Jazz applications).

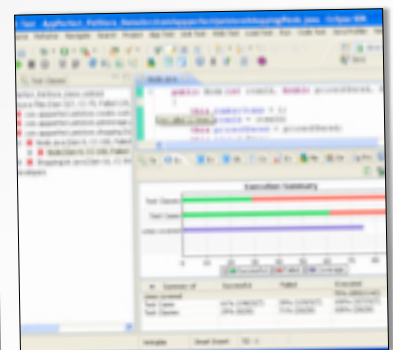

The Program Includes

RESEARCH PAPERS

INDUSTRIAL DEMOS

STUDENT PAPERS

Technical Program and Social Events
